ABOUT THE PROJECT & AIMS OF THE PROJECT

SOCIAL ENTREPRENEURSHIP FOR RURAL AREAS

Rural areas perform important economic functions in the sphere of production, demographics, recreation, culture, nature conservation and social control over the territory. The development of rural areas represents one of the most important achievement of the European Union since contributes to the economical balance.

During the 2nd stage, we will be already working on participant's own future social enterprise's business plan (environmental mission, description of the main product and service offerings, market analysis, sales plan, financial analysis, funding, etc.) and we will also give a special attention to developing of their entrepreneurial, leadership and managerial skills.

Our project is designed as a long-learning process. The first stage is followed by the second one.

Therefore the participation in both stages is crucial to reach the desired impact. We invite you to a longer and deeper journey with us.
