Human Rights Consciousness for
Youth Workers

About the project

The main aim of the proposed project is to enhance knowledge and understanding of human rights in order to foster tolerance, respect, solidarity and responsibility of the participating youth workers, so that they in turn can “spread the word”.

A comprehensive education on human rights and on the mechanisms that protect individual but also collective rights, as well as knowledge of the concomitant responsibilities and duties will be provided with the purpose of enabling youth workers & ultimately, young people to promote, defend and apply human rights in daily life. The project will convey fundamental principles, while explaining their interdependence, indivisibility and universality. Emphasis will be given on the benefits of multicultural societies, on European Citizenship and active participation.

Hosting Organization

Stichting yEUth is seated in the beautiful city of Leiden, a city full of young people and students which is actually the target group of our work: Youth Empowerment. We have the vision and we are ready for our mission.

We are lucky to have already acquired a rich and multifaceted experience as individuals from our participation in various youth projects and we intend to enrich it and get the full benefit out of it so that we can multiply the impact of these projects on Dutch youth life.
