INTRODUCTION

A LIVING DREAM – AGRARIAN LEARNING MODEL IN ELEMENTARY SCHOOL

Join us on this journey and discover how the agrarian learning model helps us become part of a more sustainable and environmentally friendly society.

An online game that will help you learn about different aspects of this piecemeal learning approach in a fun way.

MODULE

NAME OF THE UNIT

An eye-catching message to students (8-12 years) about the unit

Suggest an activity that will help students to acquire specific learning outcomes in the subject area - unit. The activity is designed for students to complete independently.

Co-funded by
the European Union

MODULE 5

INTEGRATING TECHNOLOGY INTO ENVIRONMENTAL LEARNING PROGRAMS

Explore nature using technology and find out how apps and maps can help you learn more about the world around you.

Use Google Earth or Maps to find a park or forest near your home. Zoom in and explore the area. Draw a simple map showing what you see—like trees, rivers, or paths. Add one fun fact about nature in that area, like the tallest tree or an animal that lives there and share the picture with your family and friends.

MODULE 5

CREATING DIGITAL CONTENT FOR SUSTAINABILITY EDUCATION

Turn your photos into fun eco-messages – Use filters and stickers to show how we can help the planet.

Take a photo of something eco-friendly, like a recycling bin or a tree you want to protect. Use your phone's photo editor or an app like Canva to add filters, stickers, or drawings. Write a short message, like 'Protect Nature!' Share your photo with friends or family to inspire them.

MODULE 5

ENHANCING EXPERIENTIAL LEARNING THROUGH TECHNOLOGY

Learn how sunlight and shade affect plants! Use your camera to take photos and explore how light impacts plant growth, health, and development over time. Discover how technology helps us understand the environment in exciting new ways.

Place one plant in a sunny spot and another in the shade. Use your camera to take photos daily for one week. Write down your observations, like changes in height, color, or new leaves. Compare your photos and create a small feedback or drawing about which plant grew better. Explain why sunlight is important for plants. Present your findings to your classmates or family, and think how light and technology help us understand nature.
